

Age (per year)			
Imaging-based preoperative diagnosis			
Advanced Mirizzi syndrome (Csendes II–V)			
Preoperative Csendes classification			

Figure 2. World map showing the number of cases included in the present review by country of origin. Darker shades of blue indicate more cases. Gray shapes indicate the absence of published cases.

Published Mirizzi Syndrome Cases by Country

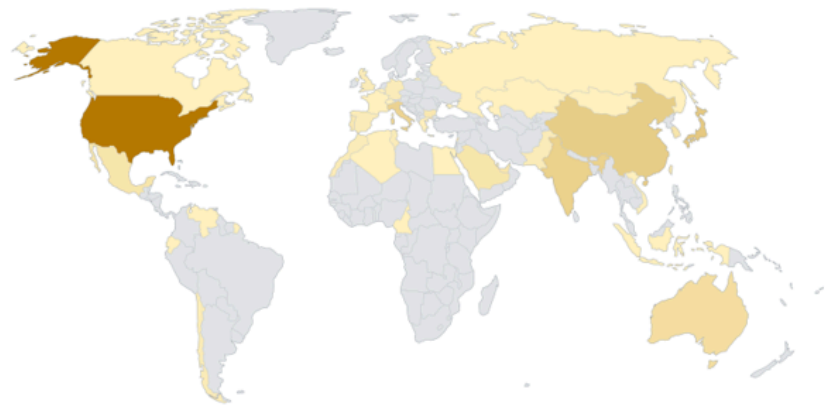

Individual patient data, n = 141

Cases, n

1

36

☐ No reported cases

Countries reflect the location of the reported clinical case.

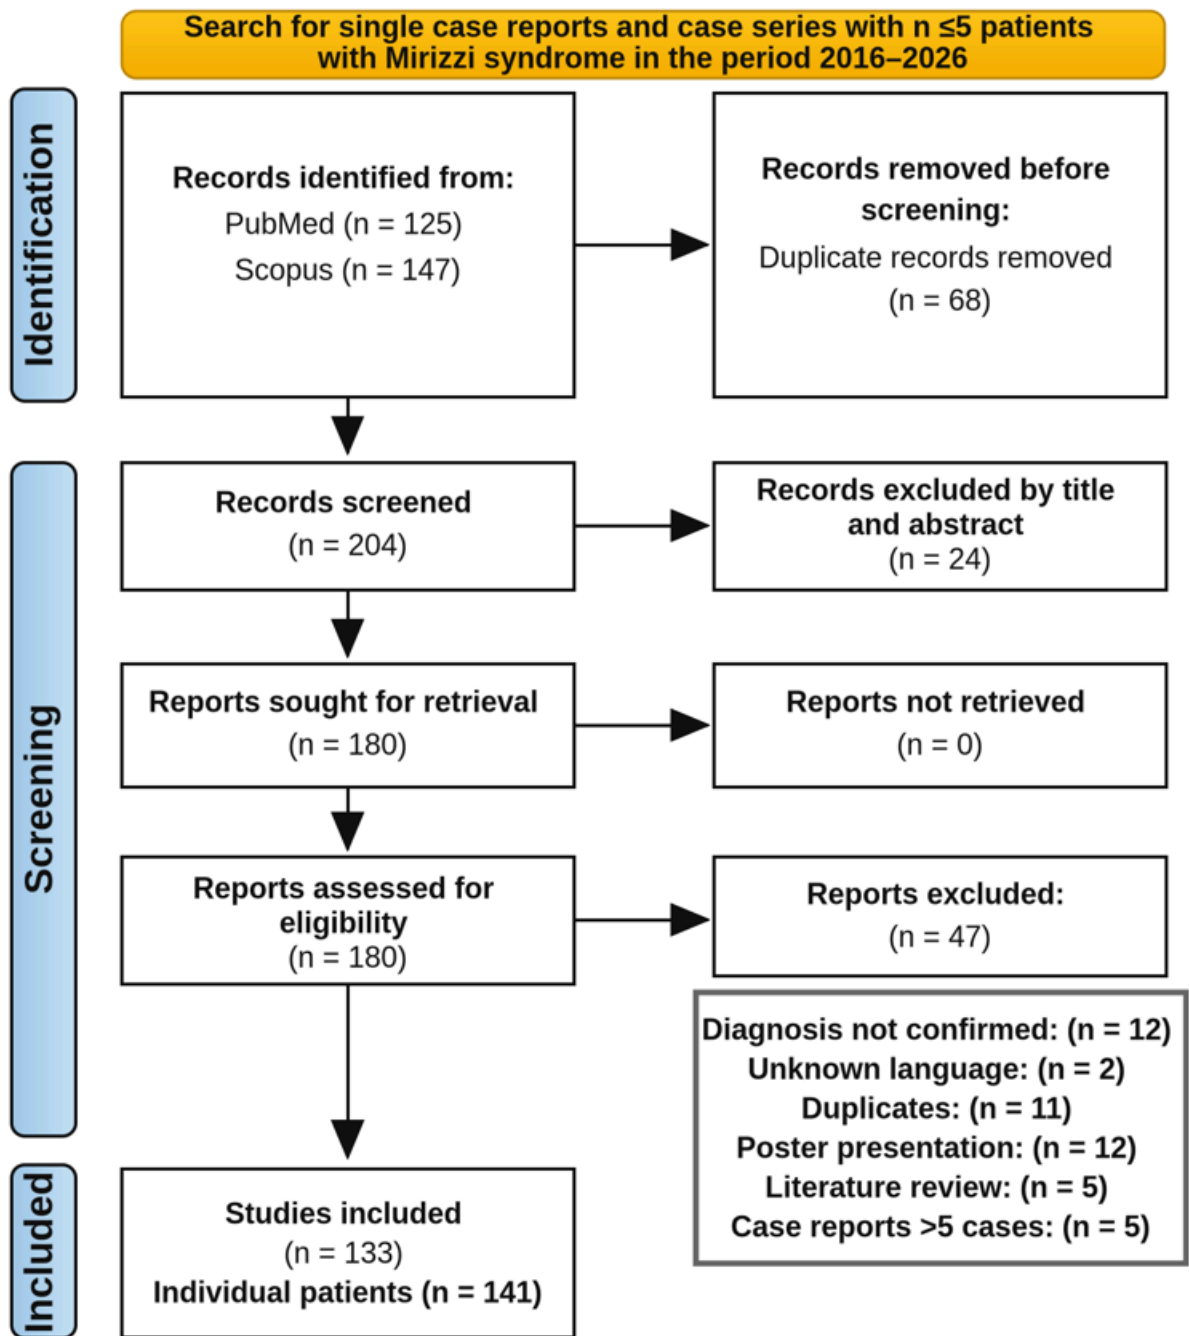

Figure 1. Flowchart indicates the registries retrieved from two datasets to the final dataset of reviewed articles, and the corresponding individual patient case reports.
